

## RAVEN® B RQ-11

Raven® is the most widely deployed small unmanned aircraft system in the world, designed for rapid deployment and high mobility for military or commercial operations requiring low-altitude intelligence, surveillance and reconnaissance. Hand-launchable, Raven provides situational awareness, day or night, with an operational range of 6.2 miles [10 kilometers] and delivers real-time video or infrared imagery to ground control and remote viewing stations via the Mantis™ i23 imaging payload system.
